20 YEARS OF INDUSTRY EXPERIENCE

We manufacture our grass fence products, chain-link fences, PVC-coated wire meshes, and razor wires entirely in our own production facilities, using manufacturing processes unique to our company and in compliance with high quality standards. By combining aesthetic design with our years of industry experience, we offer functional and visually strong solutions.

As Ekoçit, our mission in the grass fence industry is to exceed customer expectations by offering high-quality, aesthetically pleasing, and long-lasting products. By creating tailor-made solutions for each project, we aim to make living spaces safer, more stylish, and greener.

With our production approach that closely follows developing technologies, our top priority is to provide fast, reliable, and sustainable services to both individual and corporate clients. By developing environmentally friendly and nature-compatible products, we embrace a production model that protects not only today but also the future.

WE PRODUCE

In our modern production facilities, we manufacture grass fences that are resistant to outdoor weather conditions, aesthetically appealing, and environmentally friendly. We place great importance on quality control processes at every stage of production, ensuring products that are safe, durable, and visually satisfying for the end user.

In addition, we are committed to providing not just a product, but a complete service experience through after-sales support, fast delivery, and project-based custom solutions.

Our goal is not only to be a product supplier, but also a reliable solution partner in the grass fence industry.

THE EKOÇİT DIFFERENCE

In order to specialize in the fields in which we operate, we have undertaken every effort and sacrifice necessary to incorporate both the required construction tools and equipment, as well as qualified technical personnel, within our organization.

Within this framework, in the selection of the technical team employed within our group, utmost care and attention are given not only to ensuring they possess sufficient knowledge and experience in their field, but also to maintaining mutual respect and harmony among themselves, and to upholding this professionalism in their relations with the institutions and organizations they work with.

Our goal is to provide principled, high-quality, and cost-effective solutions, based on the principle of completing all projects on time.

OUR MISSION

To uphold the highest standards of quality and excellence, ensuring maximum customer satisfaction. By completing our commitments in the shortest possible time and with the highest quality, we aim to create lasting works of value.

OUR VISION

To be a respected and trusted organization in the fields we serve, growing steadily each year in line with our principles and objectives; to remain conscious of our social responsibilities, committed to our values, and sensitive to the environment; and to become a leading company that reflects the true definition of quality in the industry.

EXPERIENCE TRUST

PRODUCT CODE: E-Ç1

GRASS FENCE

It is a type of fence that serves as an aesthetic wall, concealing the space from outside view; modern, stylish, visually appealing, and resistant to corrosion.

Green

Anthracite Gray

Parliament Blue

Black

MEASUREMENT

H: 50 cm, 75 cm, 100 cm, 120 cm, 150 cm, 200 cm

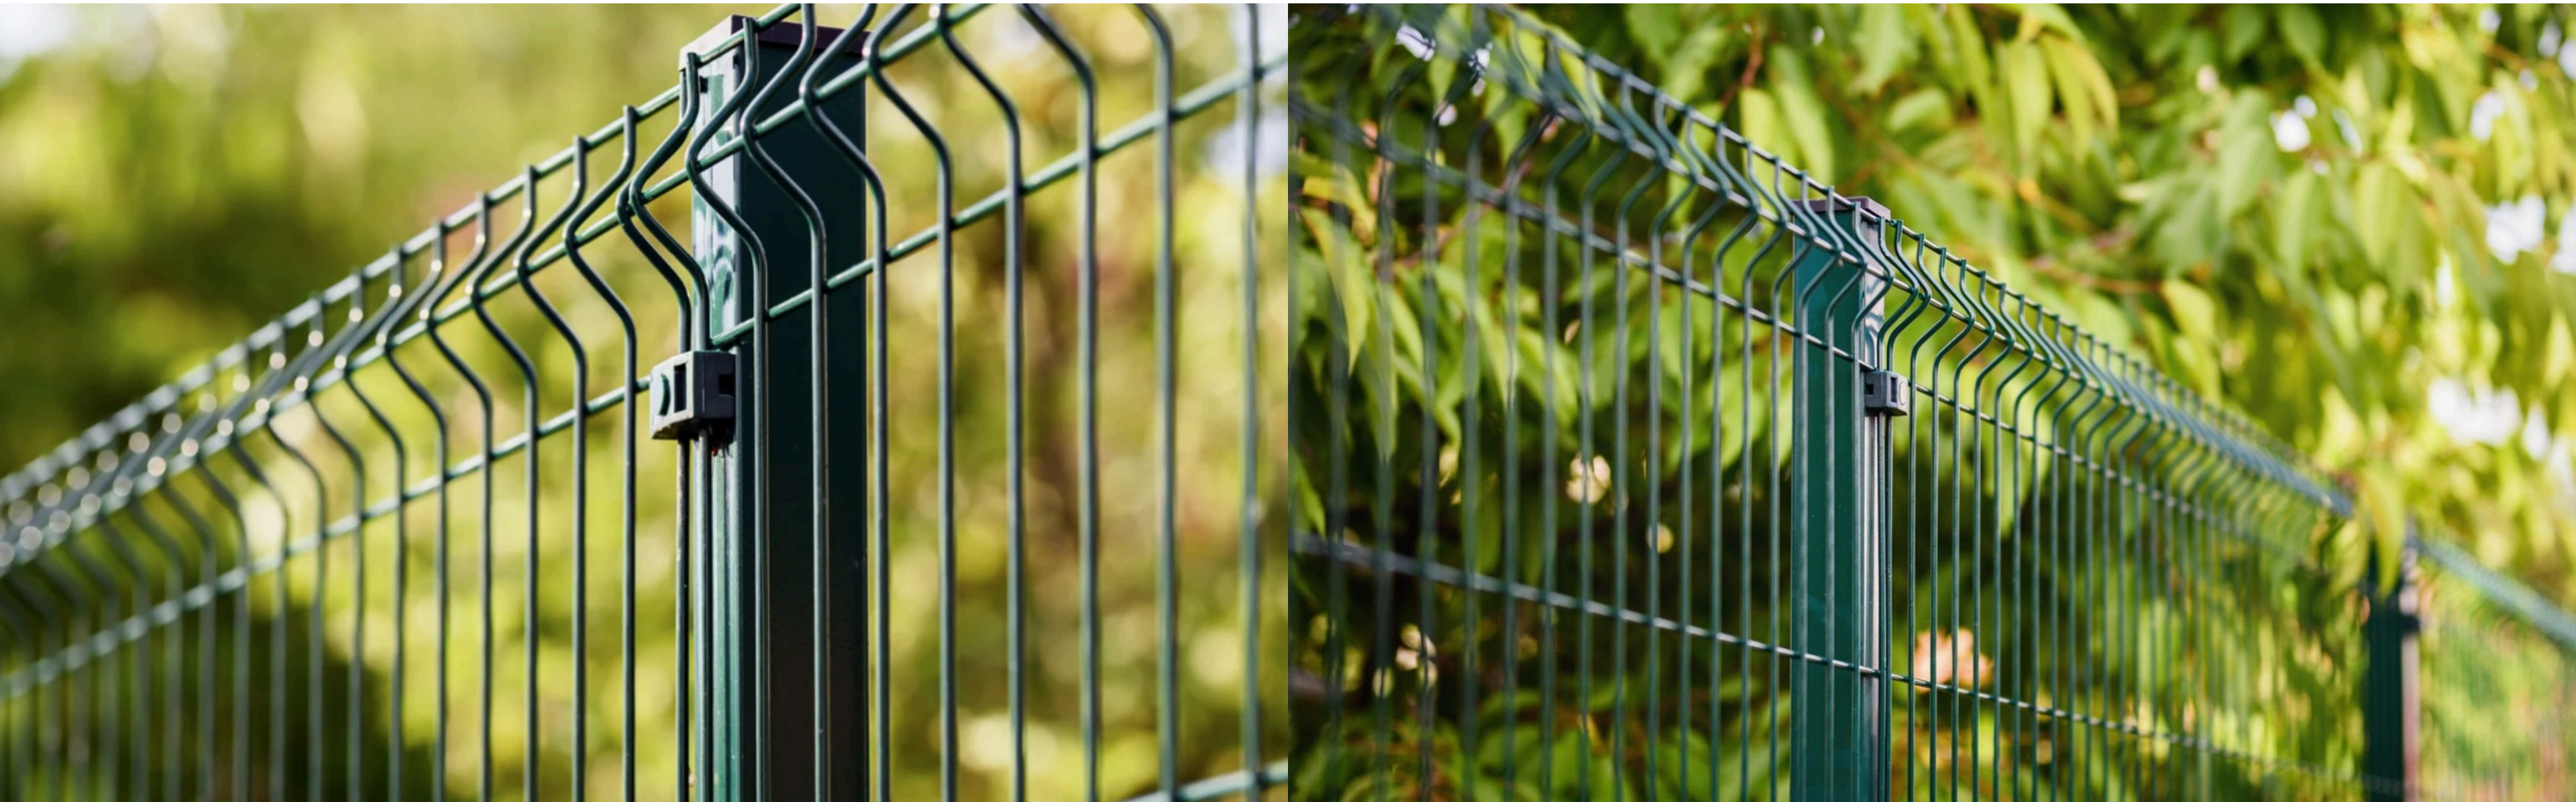

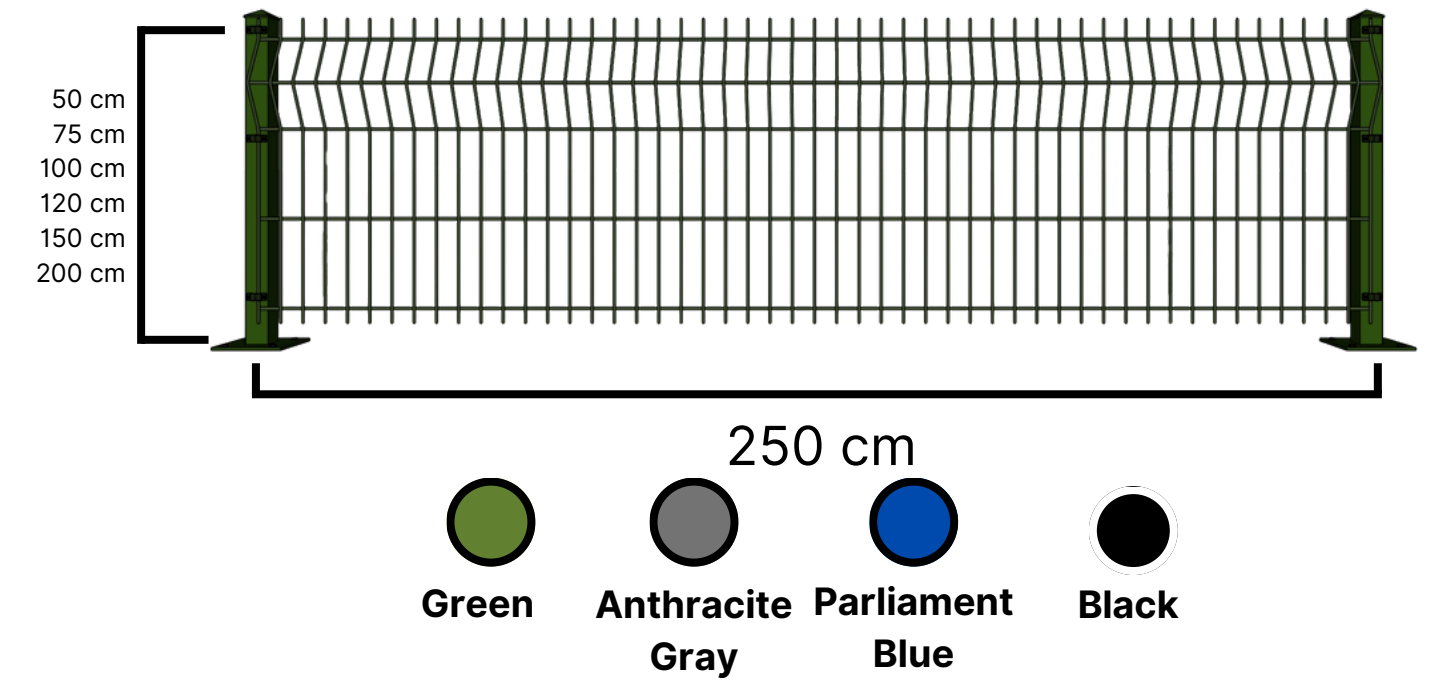

W: 1 RULO : 10 m

PITCH: 45 MM, 50 MM

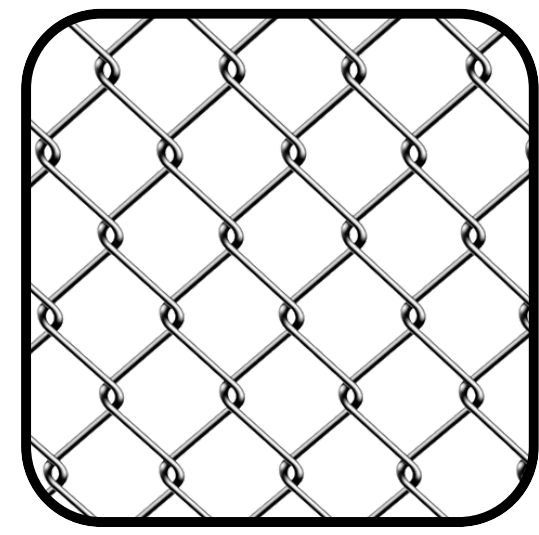

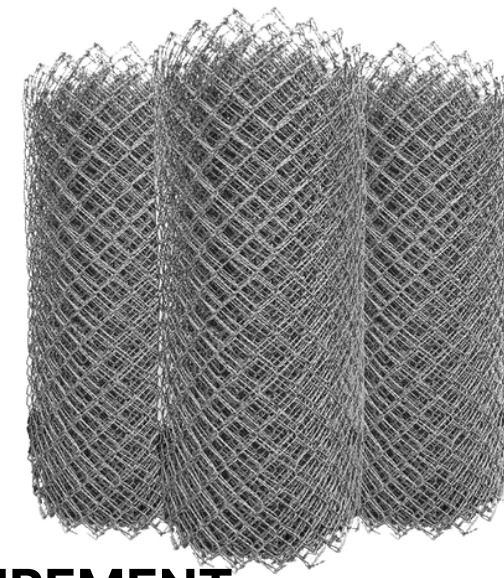

PANEL FENCE

It is designed to make boundaries more secure and robust. It is used to provide high-level security in private areas. Thanks to its modern appearance and stylish design, it does not create an unsightly enclosure around your surroundings.

GALVANIZED WIRE FENCE

These are wire fence systems manufactured using galvanized wires through a weaving method. Galvanized wire mesh is the most widely used product worldwide for perimeter security. Its long-lasting and lightweight structure allows it to be used in all types of terrain.

MEASUREMENT

H: 150 cm

W: 1 RULO : 20 m

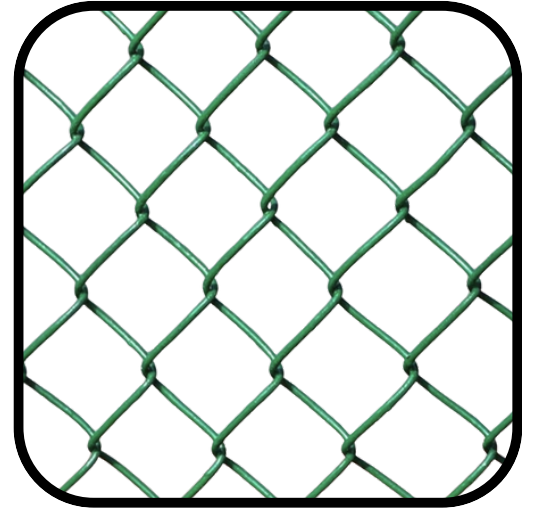

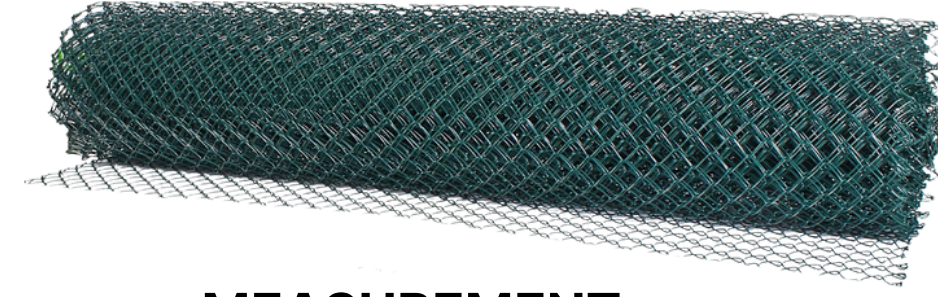

PITCH: 40 MM, 45 MM, 50 MM, 55 MM, 60 MM, 65 MM, 70MM, 75 MM

WIRE THICKNESS: 2 MM, 2,2 MM, 2,5 MM

PVC COATED WIRE FENCE

It is essentially a fence system produced by applying a PVC (polyvinyl chloride) coating over galvanized wire. This coating makes the wire mesh more resistant to external factors and extends its service life. At the same time, it provides an aesthetic appearance, contributing positively to the surrounding landscape.

MEASUREMENT

H: 150 cm

W: 1 RULO : 20 m

PITCH: 40 MM, 45 MM, 50 MM, 55 MM, 60 MM, 65 MM, 70MM, 75 MM

WIRE THICKNESS: 2 MM, 2,2 MM, 2,5 MM

BARBED WIRE

Barbed wire is a security fencing material with sharp-pointed barbs added along the wires. It is generally used for defining boundaries and ensuring security.

MEASUREMENT

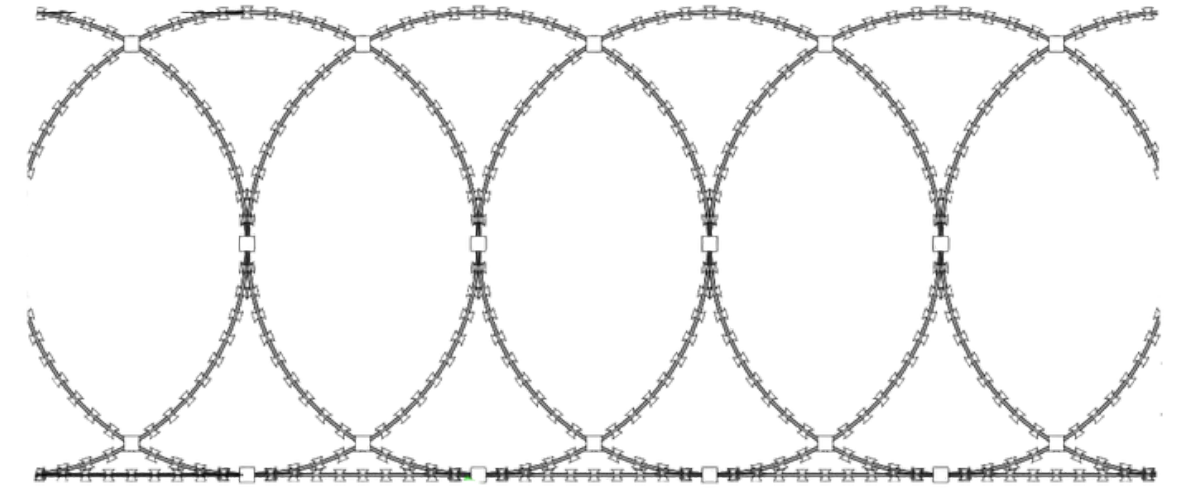

LENGTH: RULO 1,6MM: 200 M / 2MM: 250 M

WIRE THICKNESS: 1,6 MM, 2 MM

FLAT RAZOR WIRE

Razor wire, typically oval-shaped, is used to secure a designated area. Its purpose is to maximize security and prevent climbing over the fence.

MEASUREMENT

LENGHT: 1 RULO: 30 m

DIAMETER: 45 CM, 60 CM, 90 CM

WIRE THICKNESS: 1,6 MM, 2 MM

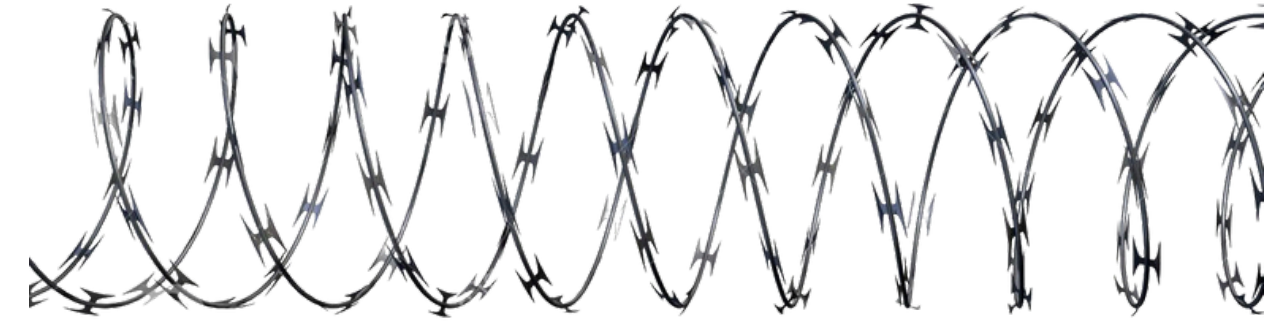

PRODUCT CODE : E-Ç7

HELICAL RAZOR WIRE

Razor wire, typically oval-shaped, is used to secure a designated area. Its purpose is to maximize security and prevent climbing over the fence.

MEASUREMENT

LENGTH: 1 RULO: 12 m

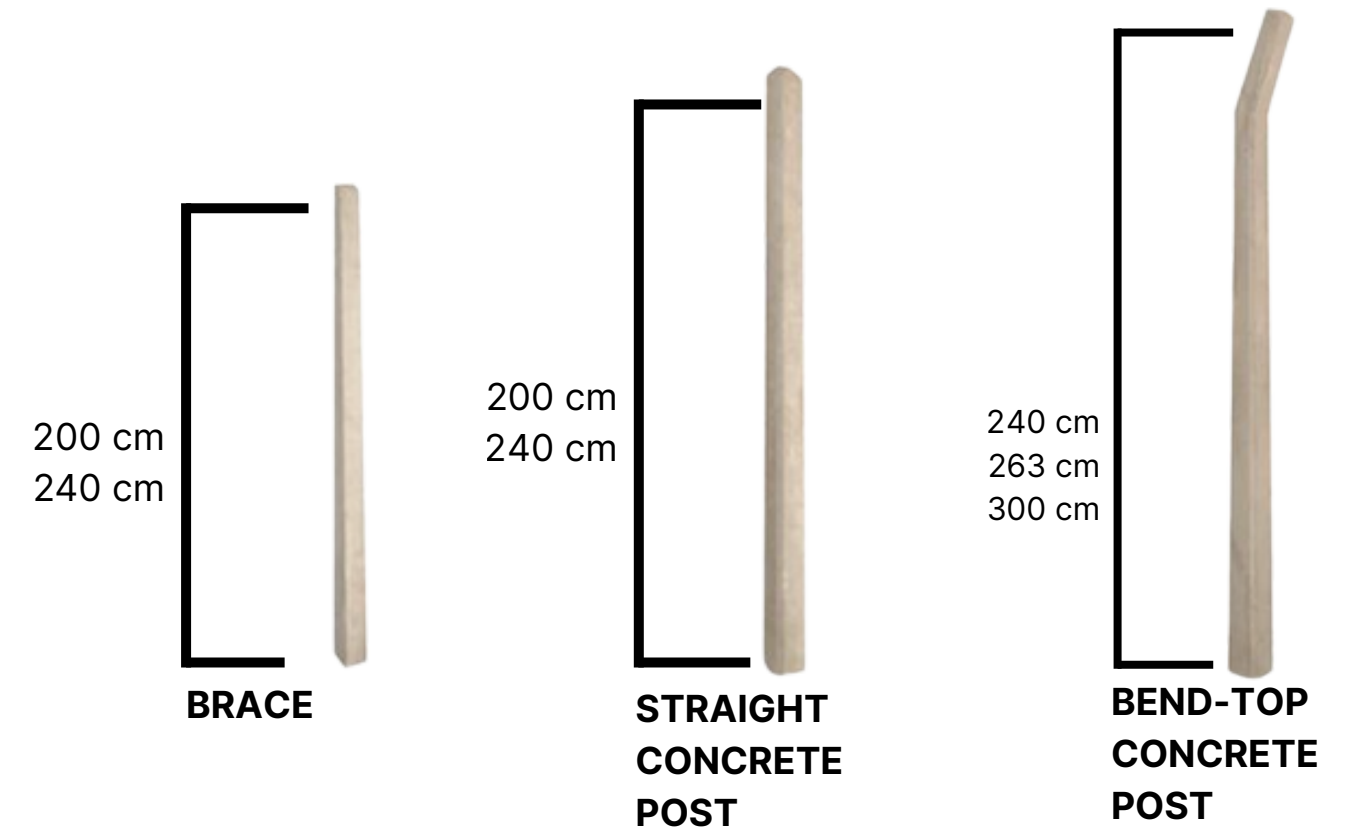

DIMETER: 45 cm, 60 cm, 90cm

WIRE THICKNESS: 1,6 MM, 2 MM

CONCRETE POST

Concrete posts are durable fence support poles, particularly used in wire mesh systems. They are resistant to heavy impacts and designed to withstand environmental conditions for many years.

ANGLE BAR

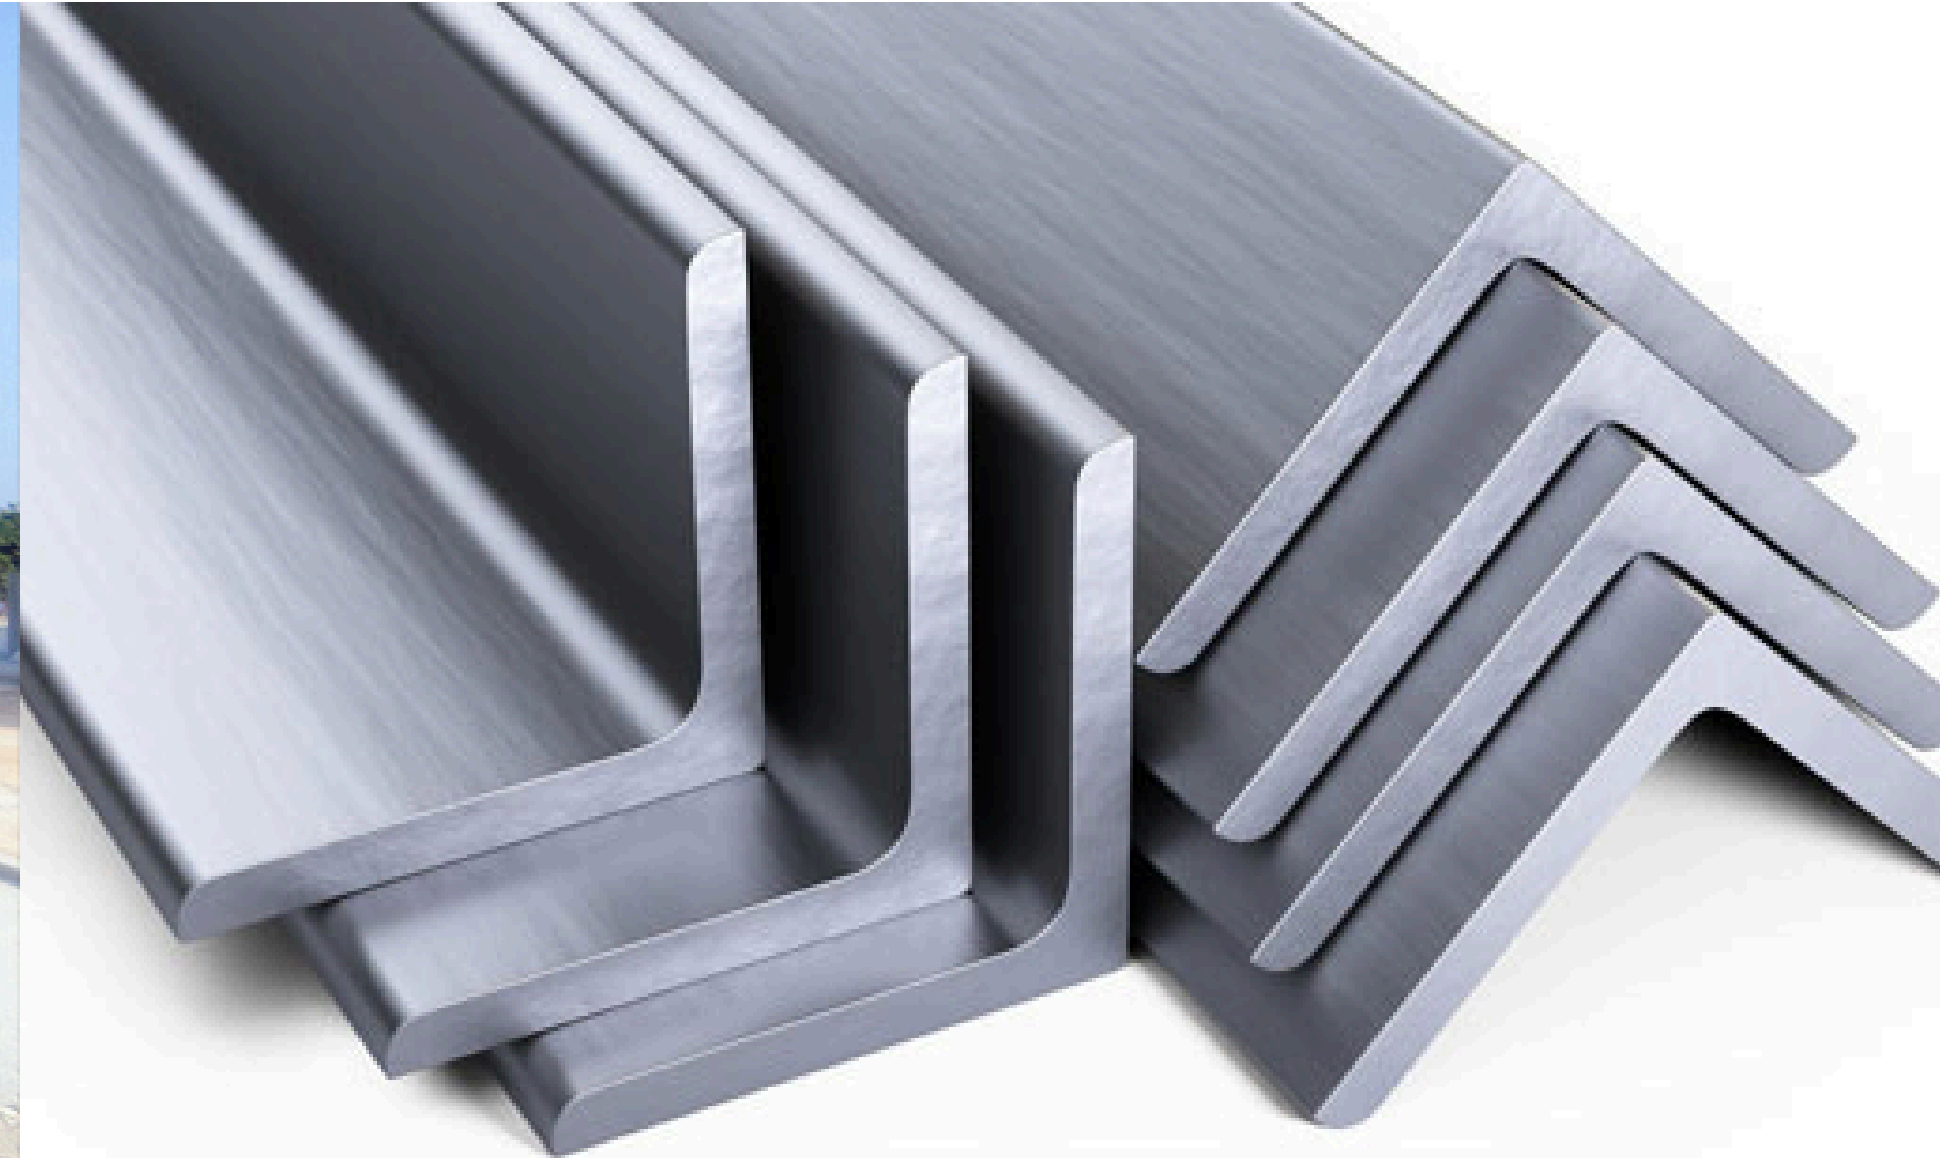

Angle posts are a type of steel profile commonly used in fence applications, providing durability and flexibility with their angular design. They are especially used as support and load-bearing structural elements.

MEASUREMENT

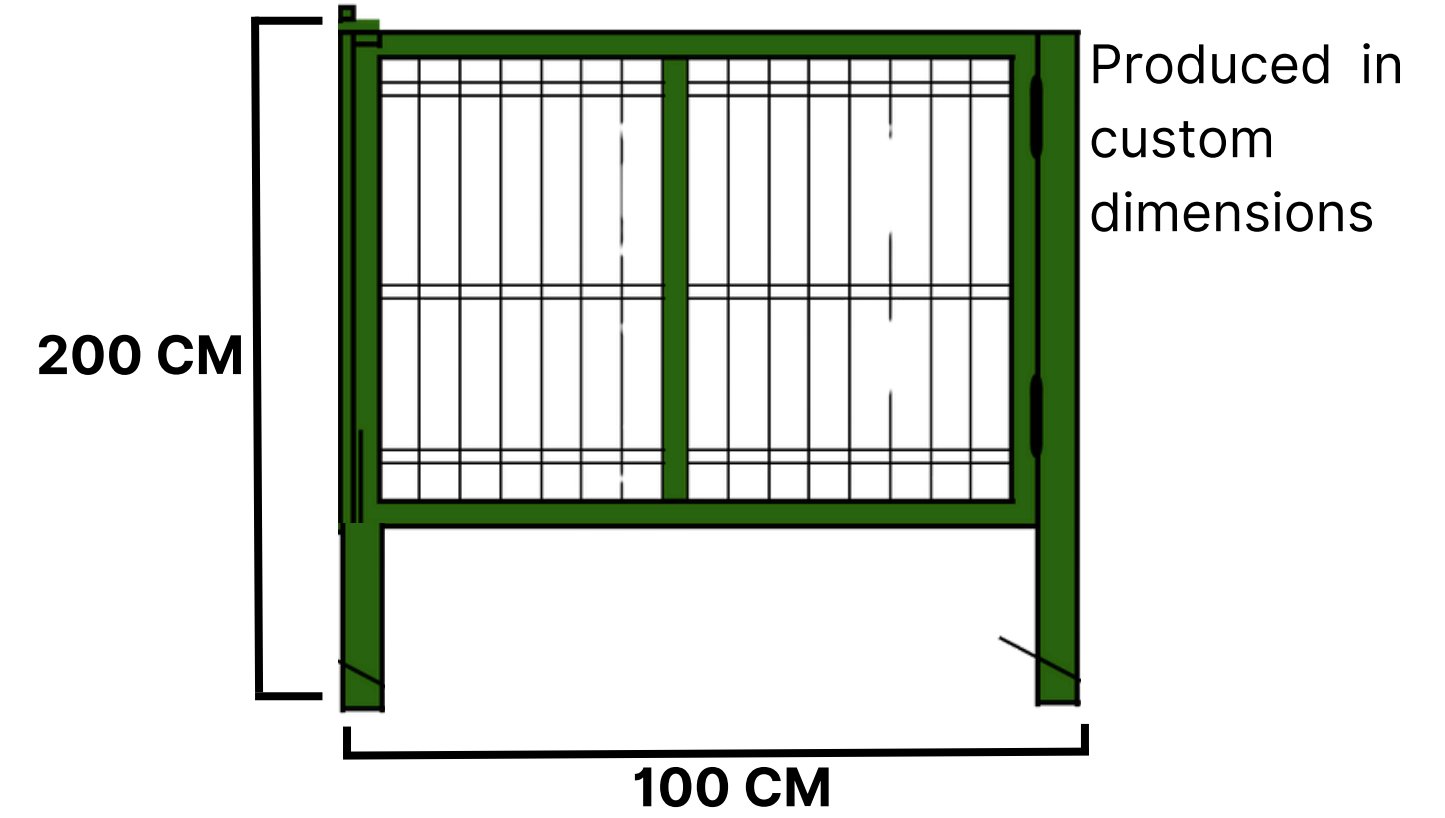

LENGTH: 200 cm

THICKNESS: 4X4X3 MM

PEDESTRIAN GATE

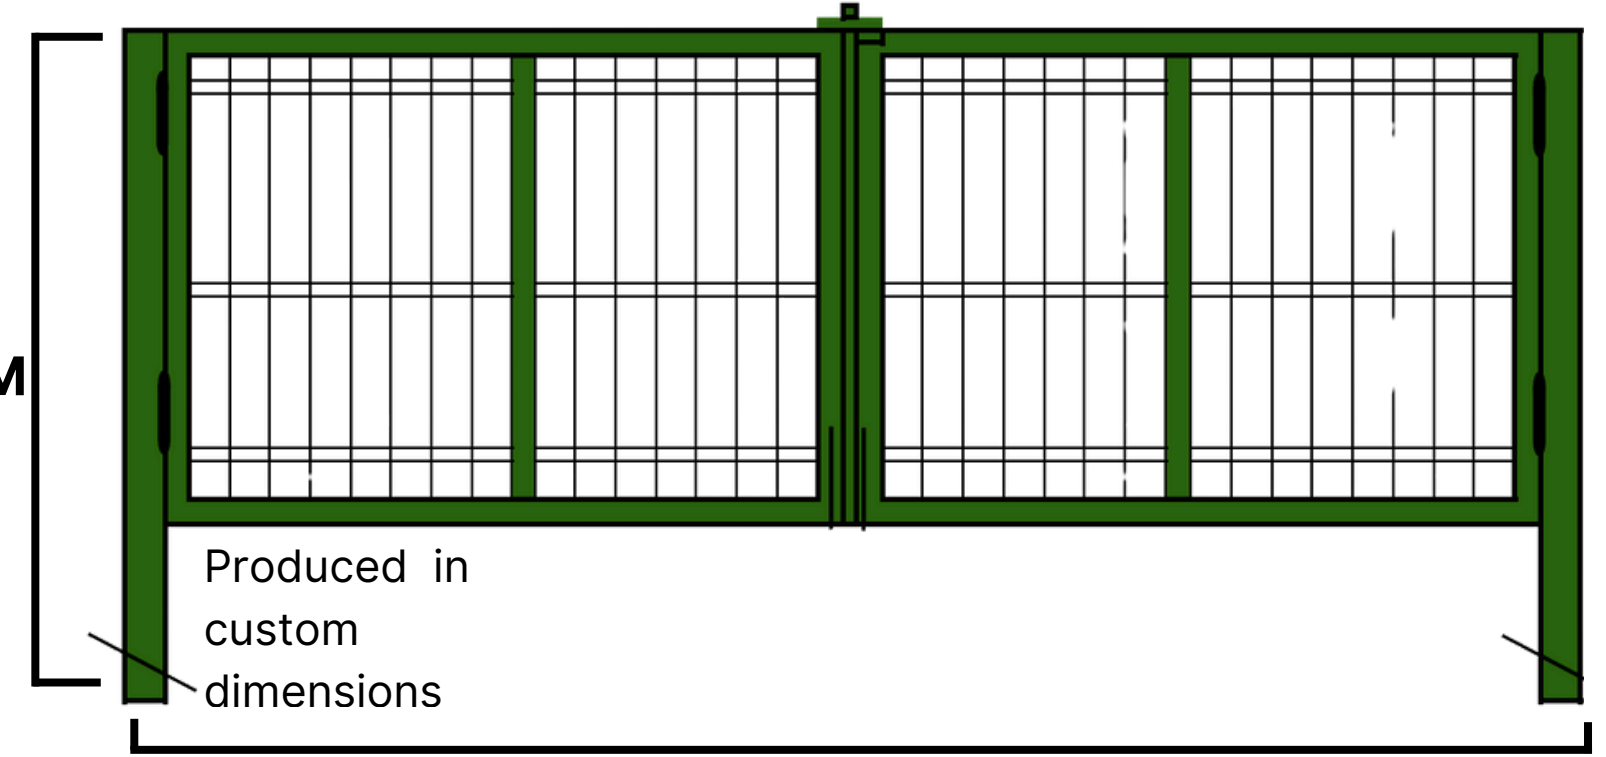

Pedestrian gates are gates that can be opened using physical force. They can be used in buildings or many other places, and it can be said that they have become increasingly preferred in recent times.

DOUBLE-LEAF PROFILE DOOR

They are double-leaf gates preferred for vehicle entrances, pedestrian access, and material entry and exit in gardens. The double-leaf design helps maximize the usable space.

200 CM

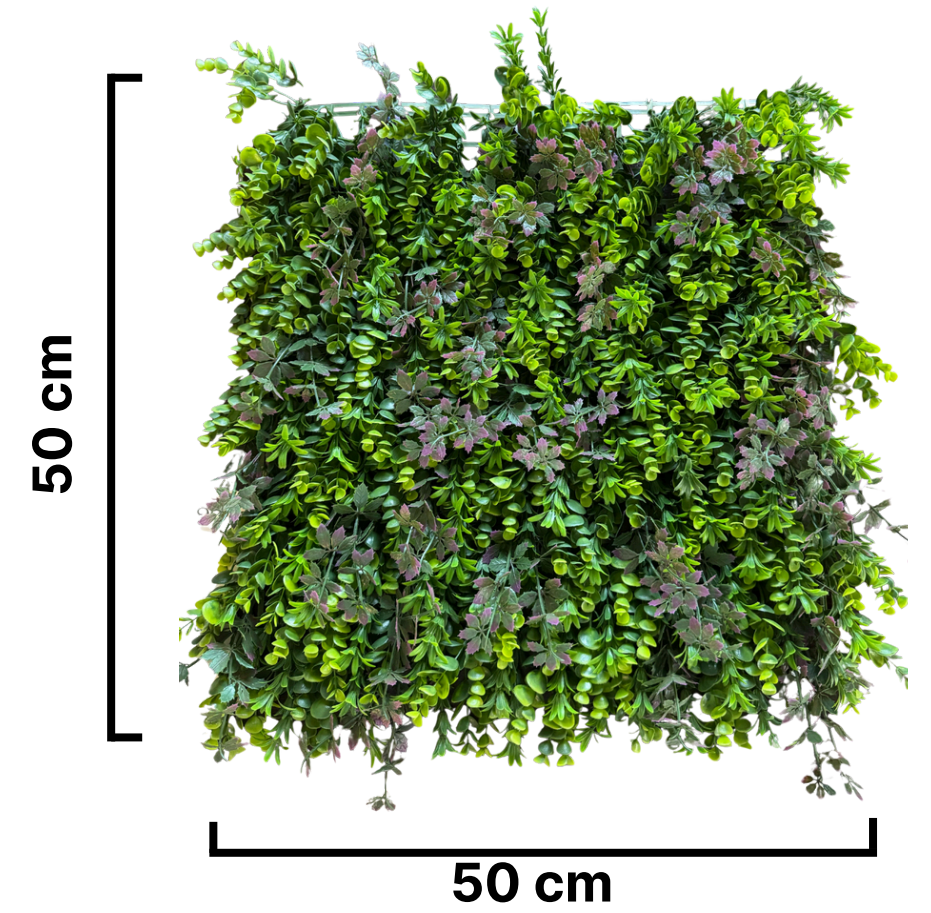

200X200 CM

DECORATIVE PLANT WALL

A plant wall, designed to bring a natural touch to indoor and outdoor spaces, can attract attention with its stylish appearance and appealing aesthetic design. Various artificial plants are combined when creating these walls.

PRODUCT CODE : E-Ç13

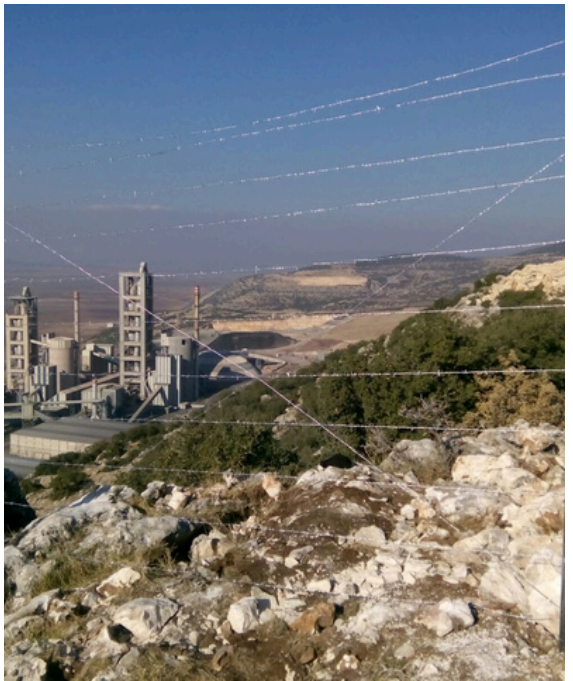

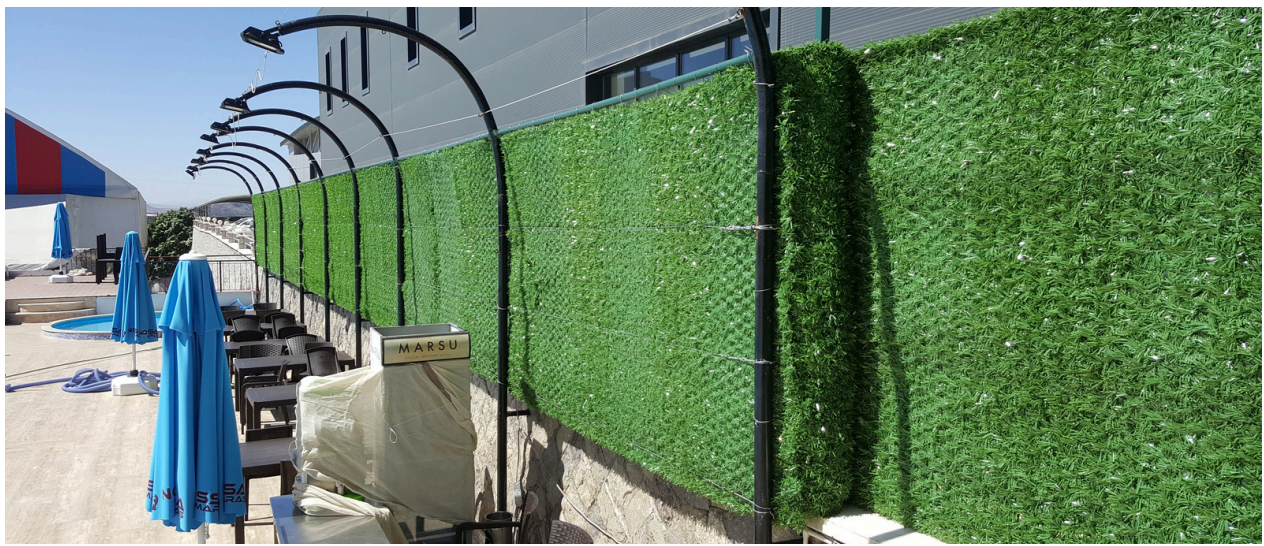

EPOXY FLOOR COATING

Epoxy Floor Coating is a two-component resin system applied to surfaces such as concrete. It creates a hard, smooth, glossy, and durable surface. This material is particularly popular and long-lasting in industrial areas, parking lots, warehouses, hospitals, schools, and sports facilities such as basketball courts, volleyball courts, and football fields.
